**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

**Claim Rejections - 35 USC § 103**

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary.

Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP-04050803-A in combination with any one of

Art Unit: 1732

Mitsuya et al (U.S. Patent 4,400,707 A), Aratani et al (U.S. Patent 6,063,468 A) or Sasa (JP-2000207772-A).

JP-04050803-A (see the entire document, in particular, the English-language abstract and the figures) teaches a process of making a microstructure (e.g., a microlens array) as recited in the instant claims, except for sputtering a light hardenable material (JP-04050803-A teaches sputtering nickel), which is taught by Mitsuya et al (see the entire document, in particular, col. 3, lines 14-26 and col. 4, lines 30-39), Aratani et al (see the entire document, in particular, col. 7, lines 9-29) and Sasa (see the entire document, in particular, the English-language abstract) and such would have been obvious to one of ordinary skill in the art at the time the invention was made in the process of JP-04050803-A in view of any one of Mitsuya et al, Aratani et al or Sasa principally because these references teach sputtering both metallic and light hardenable material and in order to apply a light hardenable material to a base (or substrate).
